First answer Don't try to compile Mapscript on Ubuntu 16 04 with PHP as long as your PHP version is not 5.. I need to upgrade from Ubuntu 14 04 to 16 04 but php5 is not officially supported on Ubuntu 16.. Mapscript-php7 Alternative PHP-Mapscript for PHP7 with the good old C-code from The MapScript support for PHP7 through SWIG is still in development. [Sims 4 Crossover Mac](#)

This may mean that the package is missing, has been obsoleted, or is only available from another source E: Package 'php5-mapscript' has no installation candidate Therefore i try to compile and install php-mapscript from scratch but i don't find any updated and working manual.. 04 5 LTS with PHP 5 5 9 -- Ubuntu 16 04 2 LTS with PHP 7 0 15 -- Ubuntu 16 04 2 LTS with PHP 7.. In the meantime I could not wait anymore and modified the old PHP5 stuff to PHP7.. Make make install #Easily Attach Your Document's Tables 3 of 9 For other operating systems you may need to compile your own MapServer from

---

source.. This will, optionally, create the PHP MapScript libraries and is not always simple to do.. First compile MapServer with your desired options, then compile with the WITH\_PHP option: cd ~/mapserver mkdir build cd build cmake -DWITH\_PHP=1..
